

Legacy reports: QA samples

23 September 2026 | 106 live application PDF previews

QA FAILED: these are diagnostic outputs, not approved legacy reproductions.

All 106 requests returned a PDF. Every preview has validation warnings.

Imported PROIONTA.xlsx: 779 products; SYNTAGES.xlsx: 172 recipes.

Import committed through the live UI: 0 errors, 1,173 warnings.

Sample product: source CODE 100; ERP 3-100-2-041.

Production: 2026-09-23; weight 5 kg; carton 10 kg; 2 pieces; pallet 500 kg.

Dates, weights, vehicle IDs, and free text are synthetic QA inputs.

Known failures:

- Missing private-label brands, contact details, origins and translations.
- Shared templates do not reproduce all brand, language and logo variants.
- Unmapped fields, text overflow, blank reference-list output.
- Customer data absent; certificate fidelity and pagination incomplete.

The following 106 pages preserve the app PDF output and native page sizes.

PDF bookmarks identify the legacy definition associated with each page.

See manifest.json and QA-REPORT.md for mappings and individual issues.

No printer jobs were submitted. No configurations were marked validated.
